**CONTINUING CONNECTED TRANSACTIONS — ENERGY  
MANAGEMENT AGREEMENTS WITH JIAHUA ENERGY CHEMICAL CO.**

**CONTINUING CONNECTED TRANSACTIONS**

The Board is pleased to announce that on 28 December 2020, after trading hours, Jiahua Energy Chemical Co. entered into the Energy Management Agreement I and Energy Management Agreement II with Sanjiang New Material (an indirect wholly-owned subsidiary of the Company) and Xing Xing (a 87% indirectly-owned subsidiary of the Company), respectively pursuant to which Jiahua Energy Chemical Co. has agreed to modify the power source of the drive motors of the circulation pumps of Sanjiang New Material and Xing Xing and in return, Sanjiang New Material and Xing Xing have agreed to pay Jiahua Energy Chemical Co. the energy saving costs at annual caps not exceeding RMB25.0 million and RMB13.0 million (on an agreed profit sharing basis), respectively for a term commencing from 1 January 2021 to 31 December 2021.

## **LISTING RULES IMPLICATION**

Jiahua Energy Chemical Co. is owned as to approximately 40.86% by Jiahua, which is ultimately controlled by Mr. Guan and Ms. Han. As Ms. Han is an executive Director and Mr. Guan is a controlling Shareholder of the Company, Jiahua Energy Chemical Co. is therefore an associate of Mr. Guan and Ms. Han and is thus a connected person of the Company and the transactions contemplated under each of the Energy Management Agreement I and Energy Management Agreement II constitute continuing connected transactions of the Company under Chapter 14A of the Listing Rules. In addition, as the Energy Management Agreements were of a similar nature, the transactions ought to be aggregated under Rule 14A.81 of the Listing Rules.

As the aggregate applicable ratio in respect of the annual caps of the Energy Management Agreement I and Energy Management Agreement II is less than 5%, the Energy Management Agreement I and Energy Management Agreement II and the transactions contemplated thereunder are therefore subject to reporting, announcement and annual review requirements but are exempt from the circular (including independent financial advice) and the independent Shareholders' approval requirements under Chapter 14A of the Listing Rules.

The Board is pleased to announce that on 28 December 2020, after trading hours, Jiahua Energy Chemical Co. entered into the Energy Management Agreement I and Energy Management Agreement II with Sanjiang New Material (an indirect wholly-owned subsidiary of the Company) and Xing Xing (a 87% indirectly-owned subsidiary of the Company), respectively pursuant to which Jiahua Energy Chemical Co. has agreed to modify the power source of the drive motors of the circulation pumps of Sanjiang New Material and Xing Xing from using electricity-driven basis to steam-driven basis where Jiahua Energy Chemical Co. has also agreed to provide the necessary steam that would be used in those modified drive motors of the circulation pumps and in return, Sanjiang New Material and Xing Xing have agreed to supply condensate water (i.e. condensate water is generated during the course of steam usage) to Jiahua Energy Chemical Co. and Sanjiang New Material and Xing Xing have also agreed to pay Jiahua Energy Chemical Co. the energy saving costs at annual caps not exceeding RMB25.0 million and RMB13.0 million respectively (on an agreed profit sharing basis), both for a term commencing from 1 January 2021 to 31 December 2021.

Sanjiang New Material and Xing Xing used to use electricity to operate the drive motors of the circulation pumps and Jiahua Energy Chemical Co. proposed to Sanjiang New Material and Xing Xing to replace electricity by steam in operating the drive motors of the circulation pumps. Jiahua Energy Chemical Co. is responsible to equip the steam-driven drive motors of the circulation pumps for Sanjiang New Material and Xing Xing, supply the necessary steam for the operation of the drive motors of the circulation pumps and Sanjiang New Material and Xing Xing would get additional condensate water and energy saving (i.e. Sanjiang New Material and Xing Xing used to use electricity to operate the drive motors of the circulation pumps. After using the steam-driven drive motors of the circulation pump, Sanjiang New Material and Xing Xing could calculate the energy saving as if they had used electricity on the same output basis) from the installation and operation of the steam-driven drive motors of the circulation pump and Sanjiang New Material and Xing Xing would then compare the energy saving costs with the additional costs incurred by Jiahua Energy Chemical Co. for providing steam to Sanjiang New Material and Xing Xing and the additional income generated by the additional condensate water during the course of steam usage and pay Jiahua Energy Chemical Co. the net energy saving costs on an agreed profit sharing basis.

The details of the Energy Management Agreement I and Energy Management Agreement II are set out below.

## **ENERGY MANAGEMENT AGREEMENT I**

### **Date**

28 December 2020

### **Parties**

- (1) Sanjiang New Material, an indirect wholly-owned subsidiary of the Company; and
- (2) Jiahua Energy Chemical Co., a connected person of the Company.

### **Subject Matter**

Jiahua Energy Chemical Co. has agreed to modify the power source of the drive motors of the circulation pumps of Sanjiang New Material and shall be responsible for the construction, installation, testing and maintenance of the drive motors for the circulation pumps. Jiahua Energy Chemical Co. has also agreed to provide technical support throughout the term and shall also be responsible for providing the necessary steam that would be used in those modified drive motors of the circulation pumps. The condensate water produced during the aforesaid steam usage shall belong to Jiahua Energy Chemical Co.. Sanjiang New Material and Jiahua Energy Chemical Co. would calculate the amount of steam used and condensate water produced according to the meters installed in the site of Sanjiang New Material. Sanjiang New Material shall be responsible for the

operation of the drive motors for the circulation pumps and shall pay to Jiahua Energy Chemical Co. the energy saving costs ((i.e. Sanjiang New Material and Xing Xing used to use electricity to operate the drive motors of the circulation pumps. After installation of the steam-driven drive motors of the circulation pump, Sanjiang New Material and Xing Xing could calculate the energy saving as if they had used electricity on the same output basis) on an agreed profit sharing basis) based on the meter installed in the site of Sanjiang New Material.

### **Term**

The term of the Energy Management Agreement I shall be a period commencing from 1 January 2021 to 31 December 2021. The parties may commence negotiations at least three months prior to the expiry of the Energy Management Agreement I for renewal. The Company will comply with the relevant Listing Rules requirements if the Energy Management Agreement I is renewed.

### **Consideration**

Pursuant to the Energy Management Agreement I, the price for steam, condensate water and the energy saving costs shall be calculated according to the terms set out in the Energy Management Agreement I and the consideration shall not exceed an annual cap of RMB25.0 million.

The price for steam, condensate water and the energy saving costs payable by Sanjiang New Material shall be agreed on the 25th day of each calendar month and would be payable by Sanjiang New Material before the 10th calendar day of the following month.

The basis of the consideration was set after arm's length negotiations between Sanjiang New Material and Jiahua Energy Chemical Co., taking into account the estimated amounts of steam, condensate water and the energy saving costs to be incurred and also the prevailing industrial standards in calculating the formulas for such payment terms.

### **Profit Sharing**

In the event that the market price of coal is higher than RMB718 per tonne (inclusive of tax), subject to the fulfilment of the production requirement of Sanjiang New Material, Jiahua Energy Chemical Co. shall have the discretion in deciding whether to continue to provide steam for those modified drive motors of the circulation pumps and Jiahua Energy Chemical Co. shall bear all related losses incurred for the provision of the aforesaid steam (if any). In the event that the market price of coal is less than RMB718 per tonne (inclusive of tax) but higher than RMB680 per tonne (inclusive of tax), Jiahua Energy Chemical Co. shall be entitled to a profit sharing percentage of 90% of the energy saving costs, which is the net amount calculated by the Finance Department of the Group through comparing energy saving of electricity usage (Sanjiang New Material could calculate the energy saving as if Sanjiang New Material had used electricity on the same output basis), the additional income generated by the additional condensate water during

the course of steam usage with the additional costs that was incurred by Jiahua Energy Chemical Co. for providing steam to Sanjiang New Material and Sanjiang New Material shall be entitled to a profit sharing percentage of 10% of the energy saving costs. In the event that the market price of coal is less than RMB680 per tonne (inclusive of tax), Jiahua Energy Chemical Co. shall be entitled to a profit sharing percentage of 80% of the energy saving costs, which is the net amount calculated by the Finance Department of the Group through comparing energy saving of electricity usage (Sanjiang New Material could calculate the energy saving as if Sanjiang New Material had used electricity on the same output basis), the additional income generated by the additional condensate water during the course of steam usage with the additional costs that was incurred by Jiahua Energy Chemical Co. for providing steam to Sanjiang New Material and Sanjiang New Material shall be entitled to a profit sharing percentage of 20% of the energy saving costs and the amount payable in the relevant month by Sanjiang New Material shall be accordingly deducted.

Sanjiang New Material requires low pressure steam (1.3 MPa) in the operation of drive motors of the circulation pumps and coal price of RMB718 per tonne (inclusive of tax) is a breakeven level, which means there is no difference between operating an electricity-driven basis drive motors of the circulation pumps and operating a steam-driven basis drive motors of the circulation pumps in terms of energy saving, which is estimated by the Group and Jiahua Energy Chemical Co..

## **ENERGY MANAGEMENT AGREEMENT II**

### **Date**

28 December 2020

### **Parties**

- (1) Xing Xing, a 87% indirectly-owned subsidiary of the Company; and
- (2) Jiahua Energy Chemical Co., a connected person of the Company.

### **Subject Matter**

Jiahua Energy Chemical Co. has agreed to modify the power source of the drive motors of the circulation pumps of Xing Xing and shall be responsible for the construction, installation, testing and maintenance of the drive motors for the circulation pumps. Jiahua Energy Chemical Co. has also agreed to provide technical support throughout the term and shall also be responsible for providing the necessary steam that would be used in those modified drive motors of the circulation pumps. The condensate water produced during the aforesaid steam usage shall belong to Jiahua Energy Chemical Co. Xing Xing and Jiahua Energy Chemical Co. would calculate the amount of steam used and condensate water produced according to the meters installed in the site of Xing Xing. Xing Xing shall be responsible for the operation of the drive motors for the circulation

pumps and shall pay to Jiahua Energy Chemical Co. the energy saving costs ((i.e. Sanjiang New Material and Xing Xing used to use electricity to operate the drive motors of the circulation pumps. After installation of the steam-driven drive motors of the circulation pump, Sanjiang New Material and Xing Xing could calculate the energy saving as if they had used electricity on the same output basis) on an agreed profit sharing basis) based on the meter installed in the site of Xing Xing.

### **Term**

The term of the Energy Management Agreement II shall be a period commencing from 1 January 2021 to 31 December 2021. The parties may commence negotiations at least three months prior to the expiry of the Energy Management Agreement II for renewal. The Company will comply with the relevant Listing Rules requirements if the Energy Management Agreement II is renewed.

### **Consideration**

Pursuant to the Energy Management Agreement II, the price for steam, condensate water and energy saving costs shall be calculated according to the terms set out in the Energy Management Agreement II and the consideration shall not exceed an annual cap of RMB13.0 million.

The price for steam, condensate water and energy saving costs payable by Xing Xing shall be agreed on the 25th day of each calendar month and would be payable by Xing Xing before the 10th calendar day of the following month.

The basis of the consideration was set after arm's length negotiations between Xing Xing and Jiahua Energy Chemical Co., taking into account the estimated amounts of steam, condensate water and energy saving costs to be incurred and also the prevailing industrial standards in calculating the formulas for such payment terms.

### **Profit Sharing**

In the event that the market price of coal is higher than RMB710 per tonne (inclusive of tax), subject to the fulfilment of the production requirement of Xing Xing, Jiahua Energy Chemical Co. shall have the discretion in deciding whether to continue to provide steam for those modified drive motors of the circulation pumps and Jiahua Energy Chemical Co. shall bear all related losses incurred for the provision of the aforesaid steam (if any). In the event that the market price of coal is less than RMB710 per tonne (inclusive of tax) but higher than RMB680 per tonne (inclusive of tax), Jiahua Energy Chemical Co. shall be entitled to a profit sharing percentage of 90% of the energy saving costs, which is the net amount calculated by the Finance Department of the Group through comparing energy saving of electricity usage (Xing Xing could calculate the energy saving as if Xing Xing had used electricity on the same output basis), the additional income generated by the additional condensate water during the course of steam usage with the additional costs that was incurred by Jiahua Energy Chemical Co. for providing steam to Xing Xing

and Xing Xing shall be entitled to a profit sharing percentage of 10% of the energy saving costs. In the event that the market price of coal is less than RMB680 per tonne (inclusive of tax), Jiahua Energy Chemical Co. shall be entitled to a profit sharing percentage of 80% of the energy saving costs, which is the net amount calculated by the Finance Department of the Group through comparing energy saving of electricity usage (Xing Xing could calculate the energy saving as if Xing Xing had used electricity on the same output basis), the additional income generated by the additional condensate water during the course of steam usage with the additional costs that was incurred by Jiahua Energy Chemical Co. for providing steam to Xing Xing and Xing Xing shall be entitled to a profit sharing percentage of 20% of the energy saving costs and the amount payable in the relevant month by Xing Xing shall be accordingly deducted.

Xing Xing requires high pressure steam (4.6 MPa) in the operation of drive motors of the circulation pumps and coal price of RMB710 per tonne (inclusive of tax) is a breakeven level, which means there is no difference between operating an electricity-driven basis drive motors of the circulation pumps and operating a steam-driven basis drive motors of the circulation pumps in terms of energy saving, which is estimated by the Group and Jiahua Energy Chemical Co..

## HISTORICAL FIGURES AND ANNUAL PROPOSED CAPS

Set out below are the historical figures and the proposed annual caps for the year ending 31 December 2021:

<b>Transactions</b>	<b>Historical amount for the period from 15 May 2020 to 30 November 2020 RMB (million)</b>	<b>Existing Cap for the period from 15 May 2020 to 31 December 2020 RMB (million)</b>	<b>Proposed Cap amount for the year ending 31 December 2021 RMB (million)</b>
1. Payment of energy saving costs to Jiahua Energy Chemical Co. by Sanjiang New Material	11.2	18.3	25.0
2. Payment of energy saving costs to Jiahua Energy Chemical Co. by Xing Xing	3.8	8.9	13.0

## REASONS FOR THE TRANSACTION

The Group is principally engaged in the manufacturing and supplying of ethylene oxide (“EO”), ethylene glycol (“EG”), polypropylene (“PP”), methyl tert-butyl ether, surfactants and the provision of the relevant processing services in the PRC. The

entering into of the Energy Management Agreements will enable the Group to extend its business relationships between the Group and Jiahua Energy Chemical Co. and further bring synergies to the parties.

The Directors (including the independent non-executive Directors) are of the view that the terms and conditions of the Energy Management Agreements are fair and reasonable and on normal commercial terms and that the entering into of the Energy Management Agreements is in the interests of the Company and its Shareholders as a whole.

## **LISTING RULES IMPLICATION**

Jiahua Energy Chemical Co. is owned as to approximately 40.86% by Jiahua, which is ultimately controlled by Mr. Guan and Ms. Han. As Ms. Han is an executive Director and Mr. Guan is a controlling Shareholder of the Company, Jiahua Energy Chemical Co. is therefore associates of Mr. Guan and Ms. Han and is thus connected person of the Company and the transactions contemplated under each of the Energy Management Agreements constitute continuing connected transactions of the Company under Chapter 14A of the Listing Rules.

In addition, as the Energy Management Agreements were of a similar nature, the transactions ought to be aggregated under Rule 14A.81 of the Listing Rules.

As the aggregate applicable ratio in respect of the annual caps of the Energy Management Agreements is less than 5%, the Management Energy Agreements and the transactions contemplated thereunder are therefore subject to reporting and announcement and annual review requirements but are exempt from the circular (including independent financial advice) and the independent Shareholders' approval requirements under Chapter 14A of the Listing Rules.

Ms. Han was interested in each of the Energy Management Agreements and she therefore abstained from voting on the board resolutions of the Company approving each of the Energy Management Agreements and the transactions contemplated thereunder. Save as disclosed, none of the Directors had any material interest in each of the Energy Management Agreements and none of them were required to abstain from voting on the board resolutions of the Company in respect thereof.

## **DEFINITIONS**

In this announcement, unless the context otherwise requires, the following expressions shall have the meanings set out below:

- |                |   |
|----------------|---|
| “associate(s)” | has the meaning ascribed to it under the Listing Rules; |
| “Board”        | board of Directors of the Company;                      |

“Company”	China Sanjiang Fine Chemicals Company Limited (中國三江精細化工有限公司), a company incorporated in the Cayman Islands with limited liability, the shares of which are listed on the Main Board of the Stock Exchange;
“connected person(s)”	has the meaning ascribed to it under the Listing Rules;
“Director(s)”	the director(s) of the Company;
